# Advantages of Global investing

# Exposure to growth/ opportunities

Opportunity to invest in themes not available in India

- India has ~5,000 companies listed on the exchange but accounts for only about 3% share of world's market capitalization.
- Global markets are home to companies of a global stature with the kind of scale, customer base, network effect and competitive moat that very few Indian companies can achieve of emulating, in the near term.
- While India holds the tag for fastest growing projected economy, almost all equity investment opportunities arising are in sunrise sectors which are not available on Indian exchanges.

# Investment philosophy

## Focus on Un-anticipated Growth

- Seeks to exploit **3 persistent inefficiencies**
  - Markets fail to look far enough ahead when appraising the earnings power of companies
  - Markets extrapolate historic growth and fail to correctly interpret catalysts that change the trajectory of growth
  - Markets over-react to short term news flow
- Market inefficiencies often drive material differences between underlying company fundamentals and market estimates (the '**Growth Gap**')
  - Disciplined investment in stocks which deliver positive earnings surprise can deliver consistent outperformance over time

# The stocks fund looks for

Forward earnings growth not yet identified by the market - the growth gap

## Core growth

Markets often fail to look far enough ahead

- Structural
- Sustainable competitive advantage
- Innovation

## Opportunistic growth

Consensus often fails to anticipate inflection

- Cyclical
- Transitional growth
- Turnarounds/ restructuring

The 'company earnings' line in the graph represents our forecast (as opposed to the consensus estimates). The opinions stated in this presentation include some forecasted views. They believe that they are basing our expectations and beliefs on reasonable assumptions within the bounds of what we currently know.
